# Jeng-Yue Liu

(412) 284-3635 | buffettl@andrew.cmu.edu | buffett0323-github-io.vercel.app | linkedin.com/in/buffettliu

## EDUCATION

**Carnegie Mellon University, School of Computer Science** — Pittsburgh, PA
Master of Science in Artificial Intelligence and Innovation — May 2027
- Relevant Courses: Multimodal ML, AI Engineering, LLM Systems, Computer Systems, ML/DL, Gen AI for Music and Audio.

**National Taiwan University** — Taipei, Taiwan
Bachelor of Business Administration in Information Management — Jun 2025
- Awards: Summa Cum Laude (**top 1%** of the school), Bachelor Degree Thesis Award, Presidential Award, Dean's List (2x).

## SKILLS

| | |
|---|---|
| **Languages:** | Python, C, C++, Java, JavaScript, TypeScript, R, SQL, Shell |
| **Frameworks:** | PyTorch, NumPy, Hugging Face, LangChain, React, Next.js, FastAPI, Flask, JUCE |
| **Tools:** | Docker, Kubernetes, Helm, PostgreSQL, Apache Spark, Airflow, Argo CD, GitHub Actions, Postman, Linux |

## WORK EXPERIENCE

**Academia Sinica** — Taipei, Taiwan
Research Assistant — Jan 2024 – Aug 2025
- Outperformed state-of-the-art models with a 47.3% reduction in multi-scale STFT loss, enabling controllable timbre–content–ADSR disentanglement in style transfer, by proposing the factorized codec with attribute-specific auxiliary task and information perturbation.
- Achieved 86% k-NN top-1 similarity across 75k+ Beatport segments by designing a zero-shot timbre encoder with SimSiam and Swin Transformer, leveraging sequence perturbation and temporal augmentations for timbre-invariant representation learning.
- Boosted instrument-specific SNR by 7% in audio-query music source separation system by developing a band-split Mamba2 with a hypernetwork that generates weights for conditioning control to improve timbre conditioning.

**Quid Inc.** — Taipei, Taiwan
Machine Learning Engineer Intern — Dec 2024 – Jun 2025
- Reduced manual prompt tuning by 10+ hours per week by optimizing search result similarity ranking and match scoring with DSPy under Chain-of-Thought and MIPROv2, and automating summary and title generation through an LLM-based assessment module.
- Advanced TikTok emerging hashtag capture accuracy by 18% through enhancing the trend-prediction module with temporal fusion transformer, enabling early identification of volatile trends for social media sentiment analysis.
- Extended internal Python testing packages to automate CI/CD testing and releases by defining CanalTask and WorkflowTemplates in Helm charts, integrating the NER lookup service with Argo Workflows.
- Minimized deployment overhead of LLM services, adopted by 160+ companies, by streamlining Kubernetes-native CI/CD workflows.

## PROJECT EXPERIENCE

**Odyssi: AI Humorous Podcast Generation Platform (CMU Startup Competition)** — Sep 2025 – Present
- Developed a semantic retrieval and re-ranking pipeline for multi-story vector search, and integrated multi-hop reasoning into a dual-host banter engine, enhancing comedic timing, conversational flow, and the overall naturalness of multi-AI host dialogue.
- Engineered a text-to-speech system combining segmented parallel processing and multi-engine optimization, achieving zero-shot voice cloning, emotion-controlled multi-speaker synthesis, and a 13× real-time generation factor.

**GraphRAG for News Analysis with LLMs** — Dec 2023 – Dec 2024
- Improved glossary adherence and cut token cost by 49%, achieving >70% expert-validated alignment, by fine-tuning LLMs with a glossary-first QA pipeline that retrieved glossary chunks and constrained answers to glossary definitions.
- Eliminated 97% of manual analysis effort by engineering GraphRAG indexing and an LLM-powered full-stack app that extracted entities, distilled cross-article insights, and revealed shifts in public attitudes via temporal entity frequency analysis.

**Human Mobility's Next Location Prediction** — Sep 2023 – Apr 2024
- Achieved 80% accuracy in human mobility next-location prediction with a lightweight model (<3 GB) by developing a multimodal hybrid GRU that fused static/dynamic movement data with spatial imagery.
